Immunization report for long-term care facilities

Long-term care facilities must report residents' influenza and pneumococcal vaccination status and the influenza vaccination status of employees to the Utah Department of Health and Human Services Immunization Program. Completing the annual report is necessary to prevent sanctions on a facility's license.

The report includes all residents and employees live in or employed by a facility between October 1 and December 31 of the reporting year. The survey is completed online by January 31 of the following year. Reporting facilities include nursing care, small health care, assisted living type I and type II, intermediate care for the intellectually disabled, and general acute hospital swing bed units. There were 354 licensed facilities in 2022; 68 submitted their reports late, 3 were sent for fines, and 2 did not report for 2022.

The portion of the survey reported is as follows:

- Influenza (flu) vaccinations received at any time during that reporting year's flu season for residents and employees.
- Pneumococcal (pneumonia) vaccinations received at any time for their residents.
- Hepatitis B vaccinations received at any time for their employees in direct contact with residents.

Immunization rates for Utah long-term care facility residents and employees, 2018–2022

*Hepatitis B vaccination is recommended for all adults, but per Utah Admin Rule R432-40, is not required for long-term care employees. Some Utah facilities do require it for their employees; consequently, data quality may vary across Utah facilities.

| Location | Facilities* | Residents | Received influenza vaccine | Received pneumococcal vaccine |
|---------------------------|-------------|-----------|----------------------------------|-------------------------------------|
| State of Utah | 352 | 20083 | 71.6% | 50.6% |
| Critical access hospitals | 15 | 312 | 65.1% | 50.0% |
| Bear River | 22 | 1090 | 78.7% | 62.9% |
| Central Utah | 14 | 383 | 73.9% | 57.7% |
| Davis County | 37 | 2296 | 75.3% | 47.5% |
| Salt Lake County | 99 | 6790 | 72.0% | 48.5% |
| San Juan County | 1 | 43 | 97.7% | 100.0% |
| Southeast Utah | 6 | 206 | 83.5% | 36.4% |
| Southwest Utah | 42 | 2116 | 61.6% | 43.1% |
| Summit County | 1 | 26 | 84.6% | 0.0% |
| Tooele County | 5 | 349 | 71.3% | 24.4% |
| TriCounty | 7 | 213 | 73.2% | 45.5% |
| Utah County | 72 | 4041 | 72.1% | 53.8% |
| Wasatch County | 3 | 222 | 55.0% | 48.6% |
| Weber-Morgan | 28 | 1996 | 71.7% | 61.1% |

Residents immunized in long-term care facilities

* 3 facilities did not report and were not included here; 1 in Davis County and 2 in Salt Lake County.

| Location | Facilities* | All employees | Received influenza vaccine | Employees in direct patient care | Received hepatitis B vaccine** |
|---------------------------|-------------|------------------|----------------------------------|---|--------------------------------------|
| State of Utah | 352 | 23012 | 49.0% | 17332 | 53.4% |
| Critical access hospitals | 15 | 2719 | 87.0% | 2043 | 92.2% |
| Bear River | 22 | 1421 | 46.8% | 1108 | 73.8% |
| Central Utah | 14 | 432 | 46.1% | 306 | 48.4% |
| Davis County | 37 | 2354 | 51.9% | 1796 | 54.3% |
| Salt Lake County | 99 | 6338 | 43.8% | 4400 | 35.5% |
| San Juan County | 1 | 60 | 91.7% | 50 | 24.0% |
