

## Immunization requirements 7<sup>th</sup> through 12<sup>th</sup> grade entry (2026-2027)

To attend 7<sup>th</sup> through 12<sup>th</sup> grade, a student must provide written proof of receiving the following vaccinations:

- 1 dose of Tdap (only Tdap vaccine given at age 10 years or older is acceptable for school entry)
- 2 doses of varicella (chickenpox)
- 1 dose of meningococcal conjugate (Only meningococcal conjugate vaccine given at age 10 years or older is acceptable for school entry)
- 3 doses of hepatitis B
- 2 doses of measles, mumps, rubella (MMR)
- 4 doses of polio
- 2 doses of hepatitis A
- Proof of receiving 5 doses of DTaP, or, if never or not fully vaccinated, proof of receiving the appropriate number of Td or Tdap doses based on the student's age.

### Recommended but not required for school entry in Utah:

- HPV
- Influenza
- COVID-19

For students claiming a previous infection with measles, mumps, rubella (MMR), varicella (chickenpox), or hepatitis A, immunity documents must be provided to the school. These documents should include the results of serological/titer testing and a written statement signed by a healthcare provider confirming that, based on positive laboratory test results, the student does not need to receive the MMR, varicella, or hepatitis A vaccines.

For medical, religious, or personal exemptions, the legally responsible individual of the student must complete an online immunization education module at **[immunize.utah.gov](https://immunize.utah.gov)** or attend an in-person consultation at a local health department. A copy of the exemption form must be submitted to the school.

For medical exemptions, a completed vaccination exemption form and a written notice signed by a licensed healthcare provider must be presented to the school.

For questions regarding your child's immunization status, contact your child's healthcare provider, your local health department, or the **Utah Immunization Program at 801-538-9450**.
