### Entering Immunizations into USIIS

There are two types of immunizations that can be entered into USIIS:

- **Administered Immunizations** – administered by your facility
- **Historical immunizations** – those administered by another healthcare provider but entered by your facility as part of the person’s immunization history.

It is extremely valuable to enter historical immunizations into USIIS for you clients. Having the most complete consolidated immunization histories in USIIS will help assure appropriate immunizations and reduce over immunization among Utahans.

1. To enter Administered Immunizations – select **Detailed Entry** menu selection, circled in red above.
2. To enter Historical Immunizations – select **Brief Entry** menu selection, circled in blue above.

## Immunizations Detailed Entry – for Administered immunizations
