Entering Immunizations into USIIS

There are two types of immunizations that can be entered into USIIS:

- Administered Immunizations – administered by your facility
- Historical immunizations – those administered by another healthcare provider but entered by your facility as part of the person's immunization history.

It is extremely valuable to enter historical immunizations into USIIS for you clients. Having the most complete consolidated immunization histories in USIIS will help assure appropriate immunizations and reduce over immunization among Utahans.

1. To enter Administered Immunizations – select Detailed Entry menu selection, circled in red above.
2. To enter Historical Immunizations – select Brief Entry menu selection, circled in blue above.

1. Constrain entry to vaccines in inventory checkbox – circled in green above:
Check this box if your facility uses the USIIS Vaccine Inventory module
Un-check this box if your facility does not use the USIIS Vaccine Inventory module.

2. Data fields

Required information [Data element label in red]	
Vaccination Date	<ul style="list-style-type: none"> • Double-click in the data entry field to automatically fill in the current date.
Financial Class Code	<ul style="list-style-type: none"> • Entry determines what selections are displayed in the Unit of Use Lot Number picklist. <i>For example</i>, if VFC Medicaid is selected for Financial Class, then only Unit of Use Lot Numbers set up in inventory as VFC funded will display for selection. • Entry also determines what Inventory Borrowed From options display for selection.
Unit of Use Lot Number	<ul style="list-style-type: none"> • If entry is “Constrained to vaccines in inventory”, entry must be from selections in pick-list—which is based on Financial Class. • If entry is not constrained to vaccines in inventory, entry may be manually entered or selected from the Unit of Use Lot Number pick-list—which is based on Financial Class.

USIIS User Documentation: Immunizations

Vaccine Brand	<ul style="list-style-type: none"> Displays if entry is not constrained to vaccines in inventory. Selection of Vaccine Brand will automatically fill in Vaccine Brand, Vaccine, and Manufacturer.
Vaccine Code	<ul style="list-style-type: none"> Will fill in automatically if Vaccine Name is entered. Can be data entered manually if 'Constrain entry...' box is not checked.
VIS Version Date	Pick-list selections are based on CDC VIS published dates for the Vaccine.
VIS Presented Date	Short cut: double-click in the data entry field to automatically fill in the current date.
Vaccinator	Enter the name of the person who administered the immunization, first name followed by last name.
Route	Immunization Route, select value from picklist.
Site	Immunization Site, select value from picklist.
Optional information	
Dosage	Cannot be a value greater than 999.99.
Inventory Borrowed From	<ul style="list-style-type: none"> Use to record if the vaccine used for the immunization was from stock not matching the patient's eligibility entered in Financial Class. Pick-list selections are determined from the Financial Class entry. <ul style="list-style-type: none"> <i>For example</i>, if Financial Class is Non-VFC Eligible, then Inventory Borrowed From selections will include VFC and Special Projects—not Private. Reason is required. If entered, Inventory Borrowed From funding category determines what Lot Numbers display for selection in the Unit of Use Lot Number picklist. <ul style="list-style-type: none"> <i>For example</i>, if Inventory Borrowed From is VFC, only VFC inventory will be displayed in the Unit of Use Lot Number picklist.
Ordering Physician	
Reaction	As applicable, adverse reaction following immunization. Select from picklist.
Reaction Note	
Invalid	As applicable, reason why vaccine administered was not valid. Pick-list options include Manufacture recall, stored too cold, Stored too warm, Other.
Invalid Note	Required if Invalid Code is "Other."
